个人简介

Tom Dhaene is a distinguished professor at Ghent University and affiliated with imec. His research focuses on data-efficient machine learning, surrogate modeling, digital twins, and electronic design automation. With a significant h-index of 57, he has been cited over 14,741 times, showcasing his substantial contributions to the field. His work includes pioneering research on FlowSOM, a self-organizing map technique for cytometry data analysis, and a surrogate modeling and adaptive sampling toolbox for computer-based design.
