个人简介

Kyoungah Cho is an academic researcher from Korea University. She has made contributions to research in topics such as Thin - film transistor and Photocurrent. With an h - index of 22, she has co - authored 169 publications. Some of her works include "Photocurrent in ZnO nanowires grown from Au electrodes", "Ultraviolet photodetectors based on ZnO nanoparticles", etc., which were published in journals like Applied Physics Letters and Ceramics International.
