个人简介

Sungho Kang is a distinguished professor in the Department of Electrical and Electronic Engineering at Yonsei University. His research primarily focuses on algorithms, computer science, and hardware design, with notable contributions in fail address memory architecture and high-speed ALPG design. His work has been published in prestigious journals such as IEEE Transactions on Computer-Aided Design of Integrated Circuits and Systems and IEEE Transactions on Circuits and Systems II: Express Briefs. He can be reached at SHKANG@YONSEI.AC.KR.
