个人简介

KANAYA HARUICHI is a Professor at the Faculty of Information Science and Electrical Engineering, Department of Electronics, and holds concurrent positions in multiple research centers. He proposed a new design theory for RFIC components using Coplanar Waveguides (CPW) lines and an integrated antenna with a semiconductor chip. He has fabricated and tested a miniaturized antenna integrated with matching circuits. He has won numerous awards, including the 2024 Umekichi Tanaka Award and the 2023 Bronze Award from the Taisei Academic Foundation. His research interests include wireless CMOS front - end development, miniaturized duplexer development, and high - temperature superconducting band - pass filter development. His
