个人简介

Hyung Min Lee is a professor at the School of Electrical Engineering. His research spans from 2007 - 2025, with an h-index and 23 citations. He is actively involved in topics like power-efficient systems, switched capacitors, and implantable devices. His research output includes 53 articles, 46 conference contributions, 5 conference articles, 3 review articles, and more. Recent works cover areas such as ocular muscle stimulation for strabismus treatment, neuromorphic processing in neural networks, and circuit design for mobile OLED displays and implantable devices. He also had media coverage in 2020.
