个人简介

Kyung Min Kim is an Associate Professor in the Department of Materials Science and Engineering at KAIST. His research interests include memristor, neuromorphic computing, probabilistic computing, thermal computing, and packaging. He has been cited 10,843 times in total and 4,228 times since 2020, with an h - index of 47 and an i10 - index of 77. He has co - authored with many scholars from different institutions. Some of his notable articles are "Atomic structure of conducting nanofilaments in TiO2 resistive switching memory" and "Nanofilamentary resistive switching in binary oxide system; a review on the present status and outlook".
